

PREScription POLICY DAVIS DERMATOLOGY

Thank you for choosing Davis Dermatology.

- Most prescriptions are written with refills.
- Please contact your pharmacy first to determine if you have any prescriptions left.
- Follow-up evaluations are required to attain prescription refills beyond the initial prescription and its refills. Please schedule follow-up appointments early so as not to run out of your medications.
- For patient safety, prescriptions will not be refilled if patients have not been seen for follow-up evaluation in the last 4 months for pills and last 6 months for topicals (ie. creams or gels). We apologize for any inconvenience as no exceptions to this rule will be granted.
- Isotretinoin (Accutane) prescriptions require monthly follow-up appointments.
- Prescription refill requests are addressed as soon as possible, but may take up to 48 business hours.
- Cosmetic appointments not related to the medical condition are not considered “follow-up” appointments for the medical condition.
- **Cosmetic Patients:**
 - If you are a cosmetic patient requesting medical assistance for diagnosis and or treatment, please inform the front desk prior to your appointment so that necessary insurance information and paperwork is attained.
 - Cosmetic patients requesting prescriptions for medical conditions must submit health insurance information and also be checked in as a medical patient.
